Biometrics Voter Registration Contractual implications

Several parties involved, including
End user, Donor community, UNDP – Purchaser, Contractor/s,
Sub-contractors

- Interactions
- Roles and responsibilities
- Sustainability of solution/registry
- Capacity building (starts by assessment)
- Budget
- Timelines

How technological options affect Procurement

- Decisions on appropriate level of Technology (geography, volume, literacy, sustainability, cost, donors and end user views, etc.)
- Property of source codes of software
- Roles, responsibilities and influence (dependancy) of vendors.
- Number of procurement processes involved
- In-house development or external contractors
- Integration of civil and voter registries
- Timelines
- Contract management

Afghanistan 2008

Scope of the Assignment

Background: Procurement for Nation-wide Voter Registration items July-Nov 2008:

Procurement based on LTAs

And adhoc Procuremen not based on LTAs, including Registration kits, Data Center Equipment, AFIS duplicate analysis

Training and Technical support on biometric system at data center level

Data Consolidation not included, responsibility of EMB

Organized within:

With the support of:

Spanish Ministry
of Foreign Affairs and Cooperation

Council of Justice

Afghanistan 2008

Scope of the Assignment – detail

Procurement based on LTAs

- 4,950 Registration Kits
- 4,950 Registration Material Boxes
- 5,500 Blue Boxes for Kits
- 35 Stationery Kits
- 59 Generators
- Communication Equipment (30 locations, incl. radio equipments, antennas, repeaters, etc.)

+

Logistic arrangements, including air freight – 7 charter and 5 regular- and sea/inland transportation

Adhoc Procurement not based on LTAs, but on ITB/RFPs processes

- 4,000 Camera Kits
- 9,000,000 Voter Reg. Forms
- Furniture (over 500 units of desks, armchairs etc...)
- IT Hardware (550 workstations, UPS, db servers, scanners, etc...)
- IT Software (550 licenses, diverse off-the-shelf software)
- Biometric Duplication Analysis System (AFIS/FRS)

Consolidated volume of approximately USD 12 mio

Afghanistan 2008 Procurement challenges

Time constraints: Urgent deliveries 10-12 weeks process reduced under LTAs to 6-7 weeks

Political pressure and instability, processes cancelled upon advise and requested to reissue later

Uncertainty of requirements: Late changes in methodology, specifications and request

Number of processes to be simultaneously conducted and coordinated

Sustainability and compatibility of biometric module with EMB data center and resources

Logistics

Weight, Volume and timelines limited choice

Access to Kabul (Airport Traffic Congestion, Export Permits from China, Landing Permits)

Unforeseen issues (Storm in Asia, Technical issues, etc)

Afghanistan 2008 Procurement Processes - Adhoc

EOIs issued with only one week time to respond. Simultaneously finalization of specifications and ITBs/RFP

Reduced bidding period, among shortlisted suppliers with proven capacity and previous experience (for most processes no possibility to provide samples)

Prebid conference for RFP Biometric Analysis system

Examination of bids in Copenhagen simultaneous with Technical evaluations (ITBs in Kabul) – 1 week

CAP/ACP submissions under exceptional expedited conditions agreed in advance

Purchase Orders for ITBs placed immediately after, in some cases preadvices to suppliers issued.

Afghanistan 2008 Procurement Processes - LTAs

RFQs to LTA holders issued with shortened timelines to receive quotes

Evaluation based mainly on price and delivery time, as per already defined quality standards / products under LTA

Purchase Orders placed based on the RFQ requirement and agreed conditions/quality levels as per the LTA.

Conakry The Procurement Process

EOI published in UNDP website, UNGM, 2 local newspapers

11 companies were shortlisted and invited to submit a proposal (RFP) on 24 August 2007

3 proposals received by the closing date of the bidding, on 24 September 2007

All bids were evaluated as per the criteria outlined in the RFP, technically and financially. As considered all three technically compliant they were invited to the Site Validation Test

The Procurement Process

Site Validation Test (SVT)

□ Purpose of the SVT:

- To validate the technical proposal and confirm that the solution offered will work in the local environment
- Reveal any weaknesses that needed to be corrected prior to implementation.
- Provide an estimate of the number of voters that can be registered in a day, providing input to the operational plan
- From a procurement perspective the Test is a purely technical assessment

Conakry

The Procurement Process

Validation test

Process:

- ❑ Each supplier provided four kits to be operated at two different locations for the test
- ❑ The operators of the kits were Guineans with no prior relationship with the suppliers
- ❑ The training of the operators were the responsibility of the suppliers

Organized within:

Conclusions and Lessons learned

- ✓ **Involve procurement as early as possible – already in the project design**
- ✓ **Ensure sufficient budget from start**
- ✓ **Clarify and manage roles and responsibilities of other stakeholders e.g. EMBs**
- ✓ **Initiate close collaboration between program and operations by early procurement planning process**
- ✓ **Be aware of constraints on operational aspects of electoral activities – no goods no election**

Organized within:

With the support of:

Spanish Ministry
of Foreign Affairs and Cooperation

CIDA

OAS

IOM

SADC
ECF

Brazilian National
Council of Justice

Conclusions and Lessons learned

- ✓ **Centralized procurement is effective to avoid local pressures**
- ✓ **Learn market structures (supply/demand/vendor driven)**
- ✓ **Planning should allocate good time for procurement process and include necessary buffers to reduce impacts of potential delays**
- ✓ **Pre-bid conferences for complex projects – potentially in the recipient country or neutral**

Organized within:

With the support of:

Spanish Ministry
of Foreign Affairs and Cooperation

CIDA

OAS

IOM

SADC
ECF

Brazilian National
Council of Justice

Conclusions and Lessons learned

- ✓ **Conduct adequate tests to validate the evaluation especially for complex products such as biometric voter registration & e-voting systems. Review samples of all sensitive materials.**
- ✓ **Contract management of suppliers**
 - ✓ Close follow up and communication with suppliers (either LTA or adhoc suppliers, including freight forwarders).
 - ✓ Advantages of expert suppliers
 - ✓ Quality standards to be clearly defined and monitored
- ✓ **Consider Sustainability (total cost of acquisition, reusability, managing expectations, etc.)**
