

1. What are the key challenges faced by EMBs when it comes to procurement of goods and services?
2. How can we ensure better assessment of the appropriateness of a technological solution?
3. How can we ensure proper and timely procurement and implementation of the introduction of new technologies?
4. How can we ensure the alignment of international recognized principles and procedures with national procedures?
5. How can we contribute to the drafting of well-defined technical specifications?
6. How do we address the issue of skills transfer and capacity building for EMBs to undertake procurement within UNDP managed basket funds?
7. What other factors may affect the sustainability of local procurement?
